WORK EXPERIENCES

CODEMONDAY CO., LTD.

Bangkok, Thailand

Software Engineer

June 2021 – February 2022

- **Commercial Banking Website Development:** Played a key role in the design and development of a dynamic commercial banking website leveraging React, TypeScript, Elasticsearch, Golang, and PostgreSQL. Ensured seamless functionality, robust performance, and superior user experience.
- **Content Management System (CMS) Development:** Engineered reusable and scalable CMS components using cutting-edge technologies, including React, TypeScript, Golang, and PostgreSQL, enhancing content publishing and management efficiency for clients.
- **Corporate Website Implementation:** Contributed to the development of the CODEMONDAY company website, delivering front-end solutions with React and TypeScript, emphasizing responsiveness and aesthetic design.

ACCENTURE COMPANY

Bangkok, Thailand

Backend Developer (Internship)

June 2020 – July 2020

- **Commercial Bank Payroll System:** Developed backend functionalities for a microservices-based payroll management system using the Java Spring Boot framework. Developed and optimized SQL queries to ensure seamless integration with a relational database, managed through DBeaver. Collaborated with a cross-functional team to gather requirements, troubleshoot complex issues, and deliver a scalable, high-performance solution aligned with client standards and industry best practices.

EDUCATION

National Taiwan University of Science and Technology (NTUST).

Taipei, Taiwan

Master of Science in Computer Science and Information Engineering (GPA:4.09/4.30).

February 2023 – December 2024

- Research Project
 - Security in Artificial Intelligence: Developed methodologies to address copyright concerns in generative AI by leveraging adversarial examples to safeguard copyrighted images. Conducted experimental analysis using Python and cloud platforms, including Google Cloud and Runpod.io.
- Relevant Coursework:
 - Designed and implemented an Uber-Eats-like website utilizing PHP for backend data querying and React.js for frontend development. Focused on optimizing database performance and user experience in real-time environments.

Shih Chien University

Taipei, Taiwan

Chinese Language Studies

March 2022 – February 2023

- Completed comprehensive Chinese language courses (Levels 1–4), enhancing cultural and linguistic proficiency for professional and collaborative environments.

Mahidol University

Nakhon Pathom, Thailand

Bachelor of Engineering in Computer Engineering (GPA:3.21/4.0)

August 2017 – May 2020

- Research Project: Developed a comprehensive online shopping platform with omni-channel capabilities to integrate multiple sales channels for seamless customer experiences. The system utilized Vue.js for front-end development, Firebase for authentication and real-time database management, and MongoDB to provide scalable back-end storage solutions.

ADDITIONAL INFORMATION

Technical skill:

- **Languages:** JavaScript, TypeScript, Java, Golang, GoLang, SQL, Python, HTML, CSS
- **Frameworks:** Spring Boot, Elasticsearch, React, Vue
- **Databases:** PostgreSQL, DBeaver
- **Cloud:** Google Cloud Platform, Runpod.io, Oracle Cloud
- **Tools:** Git, Jira, Docker, Oracle SQL Developer, DBeaver, Figma, Vercel
- **Other:** Agile/Scrum Development, RESTful APIs, Linux

Languages: Mandarin Chinese, English, Thai

Interests: Reading, playing badminton, and cooking.
